Project focus

What do you want to change?
What do you want to do differently?
Why – what data sources do you have?
For **whom** do you want to change it
(which adults, which pupils) class, year
group, ability group, key stage,
department, whole school?

Learning strategy

What does existing knowledge tell us?
What existing practice are you aware of?
What learning opportunities will you need to
create?
How are you going to access new
knowledge?
How will you review and synthesize your
learning?
How will you represent what you have
learned?

Who is going to support you on the project?
Who do you need to negotiate resource
implications with?
What equity and diversity issues have you
considered?
What methods will you use to enquire into
practice?
What resources might you need to effect change?

Enquiry Strategy
